

Class of 2014 Graduation Requirements Checklist

Student Name _____

This graduation checklist is for students in the class of 2014. To be eligible for a diploma, students must be able to check **one box** in each state Reading, Writing and Math section and **both boxes** in the Other State Requirements section. The High School Credits section is dependent on local requirements.

Class of 2014: Meeting Graduation Requirements

Students in the class of 2014 must meet several state and local graduation requirements to earn a high school diploma. Below are answers to some frequently asked questions about state testing, graduation and credits.

The back of this document includes a checklist of all the options students must fulfill to meet their graduation requirements. For more information, please contact your school counselor.

What is the state testing graduation requirement?

- **READING AND WRITING:** Pass the reading and writing High School Proficiency Exam (HSPE), assessments for students receiving special education services or state-approved alternatives.
- **MATH:** Pass one math end-of-course exam, assessments for students in special education or state-approved alternatives.
- **SCIENCE:** Students in the classes of 2013 and 2014 **do not** have to pass a science exam to be eligible for a diploma. Beginning in spring 2012, students in biology, or those in 10th grade who have yet to take a state science test, will take an end-of-course biology exam.

Note: Visit www.WAtesting.com for more information.

When will spring testing results be returned?

Paper score reports with reading and writing results are delivered to districts by June 10 each year. Math and science results for end-of-course exams will be delivered to districts by late August (as those exams are primarily given in early to mid June).

When can I retake a state exam I didn't pass?

Each August, students can take the reading and writing HSPE. They can register at www.k12.wa.us/testregistration in June. The retakes for math will be in January/February of each year beginning in 2012. The first retake for the biology end-of-course exam will be in January/February 2013.

What happens if I haven't passed all the state exams, but have passed all of my other requirements?

You will not earn a diploma. This is the same as if you haven't passed a required science class by graduation time.

How many credits do I need to graduate?

The state requires a minimum of 20 credits, but all school districts require more. Please check with your school to know your exact graduation requirements.

If I pass all the state-required credits can I earn a state diploma?

No. Local school districts only issue diplomas. There is no state diploma.

If I don't pass a math end-of-course exam, can I earn two math credits after 10th grade?

No. That option ended with the class of 2012.

Is there a different diploma I can earn that says I passed all other requirements except the HSPE?

No. Local school districts only issue one diploma. To earn that diploma, students need to pass all state and local graduation requirements.

If I haven't passed all state exams or all my required classes, will I still be able to walk with my class at graduation?

Local school districts decide who participates in graduation ceremonies.

Can I take one of alternatives, such as the collection of evidence or SAT, instead of taking the state exams?

No. Students must take each state exam at least once before accessing most state-approved alternatives (there are more specific rules for the collection of evidence). Visit OSPI's Website at www.k12.wa.us and type in graduation requirements in the search box for more specifics on how to access the alternatives.

What are my options if I don't graduate on time?

- Remain at your high school. K-12 public education is free until age 21. It's becoming more common for students to take five years to earn a diploma.
- Enroll in a high school completion program at a community college or technical college. These programs typically cost money if you are between the ages of 16 and 18. If you're 19 or older, colleges have the option to waive tuition. *Check if the college you would like to attend offers a high school completion program.*
- Begin college courses at a community or technical college without a high school diploma.
- Pursue a GED. A GED is earned after passing a series of tests. The GED, however, is often seen as inferior to a high school diploma by employers.
